FMM Certificate in Steam Engineer

SBL SCHEME

Boilers have emerged as an important and useful device for producing steam. However, improper handling, human error and management flaws continue to cause near misses, accidents and losses of life and properties. Improving knowledge and skills through training in boiler management is perhaps the most tangible way to avoid such losses.

The 4-day programme on Boiler / Steam Plant Operations and Management focuses on establishing correct practices in Steam Plant Operations. This programme also provides guidance in boiler maintenance procedures. Overall the programme will escalate the knowledge base of participants to become better Operator and Technicians in their own plant. You will gain the practical KNOW-HOW you need and more importantly, confidence to operate steam plant successfully.

COURSE OBJECTIVES

This programme will: -

- Provide in-depth professional knowledge and skills for sound and effective Boiler / Steam Plant Operations and Management practices and be acquainted with necessary know-how for operating steam plant successfully
- Provide participants with the necessary tools needed to be a Certified Steam Engineer
- Enhance the knowledge pertaining to boiler management, which is perhaps the best way to avoid losses
- Equipped participants with the latest information on steam plant
- Prepare participants for the Steam Engineers Examination conducted by JKKP
