Digitalization in the food and beverage industry

Is Malaysia ready for a quantum leap?

Tuesday, October 24, 2017, at Sunway Hotel and Spa

The proliferation of connected devices is accelerating transformation in the industrial sector. Smart machines, devices and sensors, big data analytics, and automation is creating a fully integrated and collaborative manufacturing ecosystem that uses real-time data to drive increased flexibility and responsiveness to changing demands and conditions.

Is the food and beverage industry in Malaysia ready for the leap?

Join us for a half-day program to explore benefits of digitalization for the food and beverage industry.

Thriving in a digital era?

The digital revolution is expanding rapidly and relentlessly. It is rewriting every industry and the way we live our lives. In the near future, billions of pieces of devices are expected to be connected – from cereal boxes to smart cities – disrupting the status quo and creating exciting solutions to everyday problems.

A similar shift is taking place in the industrial space. Industrial systems are becoming increasingly connected with advanced computing and large-scale data management, data analytics and sensors through the Internet. We are 'seeing, hearing and feeling' our industrial processes like never before and this is empowering the decisions manufacturers make to optimize performance.

With its increasing appetite for growth, is the food and beverage industry ripe for the digital revolution? Don't miss the roundtable discussion as our panel of experts share their view on the subject.

Who should attend?

- CEOs/Business Directors
- Business Owners
- Maintenance Managers
- Production/Operations Managers

Day/Date	Speakers	Venue
Tuesday October 24 2017	<ul style="list-style-type: none">• Malaysia Digital Economy Corporation Sdn Bhd (MDEC)• Malaysian Technology Development Corporation Sdn Bhd (MTDC)• SME Corporation Malaysia (SME Corp)	Caymen 2, 3 & 4 Sunway Hotel Resort and Spa
