

FMM Industrial Talk: Biomass Solution to Energise Industry in Malaysia

CS /45/ 2019

November 13, 2019

FREE FOR FMM MEMBERS

January 8, 2020 * 8:30am-1:30pm* Sunway Resort Hotel & Spa

Energy conservation cuts costs and conserves fast depleting fossil fuels. Recognising this fact, Vyncke has been helping industries to save energy over six decades. Steam system is an integral part of the process industry. Steam being the most popular utility forms an integral part of production at the same time is quite significant with respect to cost. Steam system, depending on the type of industry, can be somewhere from **30 % to 70 %** of the **utility cost**. Hence, **reducing energy consumption** in the steam system is imperative and need of the hour. In this session, you will get to know the steam basics and move on to focusing on four loops of steam and condensate system.

Highlights of the session include:

- ⇒ Energy Saving Opportunities in **Steam Generation**
- ⇒ Energy Saving Opportunities and Good Engineering Practices in **Steam Distribution**
- ⇒ Energy Saving Opportunities in **Steam utilisation**
- ⇒ Energy Saving Opportunities in **Condensate and Flash Recovery**

This talk is suitable for:

- ⇒ CEOs, COOs, CFOs
- ⇒ Procurement Managers
- ⇒ Energy Managers
- ⇒ ESH Officers
- ⇒ Facility/Plant Managers
- ⇒ Production Managers
- ⇒ System Integrators

Programme

8:30 am	Registration & Welcome Drinks
9:00 am	Energy Saving Opportunity with Steam: Generation, Utilisation & Best Practices
10:30 am	Q&A Session
10:45 am	Networking Coffee Break
11:15 am	Biomass Solution to Energize Industry in Malaysia
12:15 pm	Q&A Session
12:30 pm	Networking Lunch
1:30 pm	End of Programme

The organiser/sponsor reserves the right to alter the content and timing of the sessions in the best interest of the event.

Event Sponsors

CLEAN ENERGY TECHNOLOGY

VYNCKE

Over the course of more than 100 years VYNCKE has acquired a lot of expertise in converting biomass and other solids to energy. With more than 4000 references worldwide, VYNCKE installations provide energy from hot water heaters, steam boilers, thermal oil heaters, multimedia plants (hot gas, thermal oil, steam, power generation in one system) and combined heat and power plants.

VYNCKE designs and builds the entire energy plant from fuel storage to chimney, including the combustion and boiler technology, flue gas cleaning, power generation, and control and automation of the total plant.

FMM Industrial Talk: Biomass Solution to Energise Industry in Malaysia

Speakers

Kevin Vandewalle

Director, Vyncke

Kevin graduated as an Electromechanical Engineer (MSc) at the University of Leuven. Having spend almost 10 years in the renewable energy sector, active for Vyncke biomass to energy solutions, he has a profound knowledge of the implementation of biomass solutions in industrial facilities, generating cost savings for the industry and increasing their sustainability efforts.

Pradyumna Madhusudanan

Technical Director (South East Asia)

Forbes Marshall

He has been instrumental in improving energy efficiency, driving energy benchmarking in process industry and improving technical competency of FM Engineers. Pradyumna has gained experience by working with many process industries like textile, edible oil, pharma, tyre and rubber, food and beverage in reducing specific energy consumption and improving process efficiency.

This event is organised by FMM and sponsored by Vynke N.V under the FMM Business Promotion Package.

DISCLAIMER: FMM reviews requests by solution/technology providers for a platform to create awareness and market their products/services to FMM members. The FMM Business Promotion Package is offered when the solutions, technologies and products/services are deemed as useful and relevant in improving members' operational efficiency. The FMM Business Promotion Package does not constitute as an endorsement by the FMM of the products, services and technology providers.
