INDUSTRY 4.0 SOLUTION PROVIDERS

FMM Products & Services Catalogue
STRIKE YOUR CREATIVE POSE

Recommended for Industrial 4.0. Best suited for 2D & 3D designing, Data Visualisation and Data Analysis.

- Intel® Core i7-10750H
- Windows 10 Pro
- 16GB DDR4 2666Mhz
- 512GB PCIe SSD
- NVIDIA® Quadro™ T1000 4GB
- Delta E<2 Colour Accuracy
- 3-Year Onsite Warranty with 1st Year International Travelers Warranty

A durable 16.6mm thin device has 23 hours of battery life, wakes from sleep-mode in 1 second and only 1.1kg light.

- Intel® Core i7-10510U
- Windows 10 Pro
- 8GB DDR4 onboard
- 1TB M.2 PCIE NVMe
- NVIDIA® GeForce® MX250 2GB
- 3-Year Onsite Warranty with 1st Year International Travelers Warranty

Industrial modernization and the shift to smart manufacturing/Ind 4.0 has sparked innovations in automation, robotics and the industrial internet of things (IIoT). Introducing artificial intelligence (AI), interoperability and secure connectivity enables real-time monitoring, control and optimization of processes, resources and systems – all of which can lead to greater productivity, increased safety and reduced costs.

Maxtrax Engineering scalable solutions and strong ecosystem of partners allow our customers to operate seamlessly across a single architecture from sensor to cloud, whilst addressing varied performance, real-time, functional safety and security needs.

FMM INDUSTRY 4.0 Solution Providers

smartsense

INDUSTRIAL REVOLUTION 4.0

WHAT WE PROVIDE

- Industrial Robotic Automation System
- Auto-Reporting Mobile App
- Industrial Conveyor System
- Cloud Reporting System
- 3D Simulation Designing
- Robotic System HMI

FOR ALL MANUFACTURING INDUSTRIES

- Packing & Palletizing
- Screwing & Assembly
- Injection Handling
- Material Handling
- Spray Painting
- CNC Handling
- Arc Welding

YOUR ONE STOP SOLUTION!

Message by FMM President

Tan Sri Dato’ Soh Thian Lai
President, Federation of Malaysian Manufacturers

FMM Advocates Transparency, Integrity and No Corruption

Digitalisation is transforming economies and societies in the world. Manufacturing has been leading the adoption and development of next generation technologies such as Additive Manufacturing, Artificial Intelligence (AI), Big Data Analytics, Advanced Materials, Cyber Security, Simulation, Cloud Computing, Augmented Reality, Internet of Things (IoT), Autonomous Robots, and System Integration enabling new business opportunities, increase efficiency and solving unique challenges.

Industry 4.0 is expected to extend and accelerate the benefits of technology to people, enterprises and industries alike, yet there are more challenges that lie ahead. Future manufacturing development needs to essentially target solving realistic problems, and the right timing that each industry needs to identify specific areas where embracing digital and intelligence, is critical to make a sustainable difference.

Thus, understanding the realistic demands need to be the starting point for government, industry players, and solution providers to integrate their efforts to ensure necessary readiness in time. Collaboration among stakeholders in the entire ecosystem is fundamental to identify, build and deliver the expected Industry 4.0 benefits for the nation.

With this objective, FMM is pleased to be a key Industry 4.0 stakeholder in Malaysia when invited by Ministry of International Trade and Industry (MITI) to co-organise the launching of the National Policy on Industry 4.0, known as Industry4WRD on October 31, 2018. The objective of the Industry4WRD is to drive digital transformation of the manufacturing and related services sectors in Malaysia. The Launching Ceremony was officiated by the former Prime Minister, Tun Dr Mahathir Mohamad.

In line with the Government’s aspiration to promote and support the role of Industry4WRD in national development, the Federation of Malaysian Manufacturers (FMM) established the Industry 4.0 Committee in 2017 to promote Industry 4.0 to FMM members and also recommend implementation strategies.

In this regard, we hope that the publication of FMM Products and Services Catalogue: INDUSTRY 4.0 Solution Providers, which showcases over 200 solution providers and companies, would serve as a guide to Malaysian products and services for the adoption of Industry 4.0 amongst local businesses.
Welcome to the FMM Product and Services Catalogue: INDUSTRY 4.0 Solution Providers.

The impact of COVID-19 in 2020 is now causing radical changes across the manufacturing sector, compelling companies to embrace new technologies and digital workflows at an accelerated pace. Despite the adverse impact to health and the economy, COVID-19 can also be viewed as a game changer to accelerate the transformation of Malaysia as both businesses and the public sector can re-strategise to invest in more integrated digital infrastructure to manage current and future disruptions. Over the last few months, we’ve seen years-long digital transformation roadmaps compressed into weeks in order to adapt to the new normal as a result of COVID-19.

Before COVID-19, Industry 4.0 was already an area of great interest to many manufacturers. It was an exciting topic with huge potential benefits and was widely regarded as a future thinking topic since it may assist companies to transform their operations in many aspects ranging from production efficiency to product customisation and service effectiveness. Due to the crisis, the role of Industry 4.0 becomes even more critical with industry players now utilising digital solutions to weather the storm.

Today, the Industry 4.0 is improving the manufacturing operations around the world. In cities from Stockholm to Taipei to Kuala Lumpur, Internet-connected sensors are monitoring operation patterns, providing the factory manager with key data on how to improve operations and communicate with warehouse system. Similar information flows are improving logistics and warehouse delivery systems. Sensors in manufacturing plants are also helping to raise productivity, lower costs and increase production safety.

To strength the Industry 4.0 ecosystem and promote of Industry 4.0 initiative in Malaysia, we have published this Industry 4.0 catalogue. FMM Product and Services Catalogue: INDUSTRY 4.0 Solution Providers is one of the several initiatives by FMM Industry 4.0 Committee to promote Industry 4.0 towards strengthening the manufacturing ecosystem and would be a useful reference for FMM members and Malaysian manufacturers in identifying suitable Industry 4.0 Products and Services to implement in their businesses.
Industry 4 WRD

National Policy on Industry 4.0

The Vision
- Malaysia’s vision for the manufacturing sector in the next 10 years
- Strategic partner for smart manufacturing & related services in Asia Pacific
- Primary destination for high-tech industry
- Total solutions provider for advanced technology

The National Goals
- Specific goals to guide and measure the progress of transformation
- Labour Productivity Growth
- Manufacturing Contribution to Economy
- Innovation Capacity
- High-skilled Jobs

The Shift Factors
- A set of shift factors that need to be optimised in a balanced manner
- People
- Process
- Technology

The Enablers
- Specific enablers that determine the strategies, policies and action plans
- Funding & Governmental Incentives
- Infrastructure: Efficient & Effective Digital Infrastructure
- Regulations: Regulatory Framework & Industry Adoption
- Skills & Talent: Upskilling Existing & Preparing Future Talents
- Technology: Access to Support Technologies
INDUSTRY 4WRD READINESS ASSESSMENT
Get your firm assessed. Be ready for Industry 4.0.

All you need to know about Industry 4WRD RA

Who is eligible?
- Manufacturing and its related services sector
- Valid registration and business licences
- Company has at least 60% local equity
- In operation for more than 3 years

What is it?
Trained assessors will help you to understand your readiness for Industry 4.0 and make recommendations on where to start your transformation.

What are the benefits?
- To identify areas of improvement in terms of people, process and technology.
- Receive comprehensive readiness report.
- Be entitled to apply for financial incentives.

Incentives for RA
- 500 SMEs will be selected for free assessment.
- Others will get tax exemption on RA fees up to RM27k.

Enquiries
- General: i4.0@miti.gov.my
- RA: industry4wrd@mpc.gov.my

Process Flow
A FEW SIMPLE STEPS
1. Apply online at www.miti.gov.my/industry4wrd
2. Evaluation by Committees
3. Onsite Assessment
4. Receive RA Report
5. Develop Intervention Proposal
6. Apply for Financial Incentives
7. Implement the Intervention Plan
INDUSTRY4WRD RELATED INCENTIVES

Having the extra capital allows SMEs to flourish and prosper. Find the suitable fund for your company.

01 | LOANS

**Soft Loan Scheme for Automation and Modernisation (SLSAM)**
- targets manufacturing sectors
- 4.0% interest rate per annum for SMEs

Industry Digitalisation Transformation Fund (IDTF)
- targeted sectors: AI, Robotics, Automation etc.
- provides a 2% interest rate subsidy

Domestic Investment Strategic Fund (DISF)
- 50:50 matching grant to companies adopting Industry 4.0 enabling technologies
- targets selected manufacturing and services sectors
- [www.mida.gov.my](http://www.mida.gov.my)

**Coming Soon!**
1. Intervention Fund*
   - 70:30 matching grant up to RM500,000.
2. Industry4WRD DISF*
   - 60:40 matching grant
   *participation in Industry4WRD RA is a prerequisite to apply

02 | GRANTS

Digital Transformation Acceleration Program (DTAP) Pilot Grant
- 1:1 matching grant
- targets large corporate and mid-tier companies in Malaysia
- assists companies to tap on the expertise of Digital Transformation Labs (DTL)
- [www.mdec.my/dtap](http://www.mdec.my/dtap)

Automation Capital Allowance (Automation CA)

For Labour Intensive Industries:
- Automation CA of 200% on the first RM4 million expenditure incurred within 5 years

For other industries:
- Automation CA of 200% on the first RM2 million expenditure incurred within 5 years
- [www.mida.gov.my](http://www.mida.gov.my)
Industry 4WRD Intervention Fund

The Industry 4WRD Intervention Fund is a financial support facility for Malaysian Small and Medium Enterprises (SMEs) in the manufacturing and related services sectors to embrace Industry 4.0.

It is a matching grant 70:30 on reimbursable basis based on eligible expenditures, up to a maximum grant of Ringgit Malaysia Five Hundred Thousand RM500,000.00

The Fund is provided to support companies in implementing intervention projects based on the recommendation of Industry 4WRD Readiness Assessment (RA) Report on the shift factors of people, process and technology.

Eligibility Criteria

- Manufacturing or manufacturing-related-services (MRS) companies incorporated under the Companies Act, 2016.

- Small Medium Enterprises (SMEs):

<table>
<thead>
<tr>
<th>Manufacturing</th>
<th>MRS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales turnover from RM300,000 to not more than RM50 Million and/or employee from 5 to not more than 200</td>
<td>Sales turnover from RM300,000 to not more than RM20 Million and/or employee from 5 to not more than 75</td>
</tr>
</tbody>
</table>
• In operation for at least 3 years in the current business line.

• Possess a valid business license and/or Manufacturing License.

• Completed the Government-funded Industry4WRD Readiness Assessment (RA) Programme – received report from the Malaysia Productivity Corporation (MPC)

Eligible Expenditures

• Only expenditures based on the recommendations of RA report will be considered.

• The following expenditures will not be eligible:
  - Purchase or rental of land, building, vehicles and furniture;
  - Premise renovation;
  - Collateral or loan for any purpose;
  - Marketing/promotional activities;
  - Operation expenditure including salary, employee benefits, travelling expenditures;
  - Expenditures on R&D activities; and
  - Working capital not related to the project.

Documents needed to apply Industry4WRD Intervention Fund

• 1-page Application Form

• Industry4WRD Readiness Assessment (RA) Report (with MPC’s cover letter)

• Technical Proposal

• Financial Statements (audited) for the past three (3) years

• Manufacturing License from MITI or a Confirmation Letter for Exempted from Manufacturing License from MIDA
Domestic Investment Strategic Fund (DISF)

- DISF was introduced in Budget 2012. Objective is to accelerate the shift of Malaysian-owned companies in targeted industries to higher value added, high technology, knowledge intensive and innovation-based industries.

- Matching grant (50:50) on reimbursable basis for the eligible expenditures.

- Eligible to all companies with Malaysian equity ownership of at least 60%.

- Effective date of application is from 3 July 2012 until 31 December 2020.

The grants are rewarded on a matching basis based on reimbursable basis for the following activities

- R&D activities
- Training activities
- Modernisation/Upgrading facilities & equipment
- Licensing or Purchase of New/High Technology
- Obtaining International Standards/Certifications

For Industry 4WRD DISF:

These expenditures must be related to Industry 4.0 and in line with the recommendations in the Readiness Assessment (RA) Report.
Automation Capital Allowance (ACA)

Introduced under the National Budget 2015

Objectives:

- To encourage manufacturing companies to engage in innovative and productive activities
- To enhance quick adoption of productivity in manufacturing sector
- To encourage quick adoption of automation specifically for labour intensive industries
- To further spur automation initiatives

Collaboration with SIRIM

- Applications for the Automation CA are jointly evaluated by MIDA (non-technical) and SIRIM (technical).
- SIRIM undertakes technical verification based on the following productivity measures:
  
  a) Reduction in number of workers/operators
  
  b) Reduction in number of man hours
  
  c) Increase of production volume
  
  d) Quality improvement

Other factors (i.e.: energy efficiency, worker safety, smart manufacturing)
CATEGORY 1 – Labour-intensive industries

Automation Capital Allowance of 200% on the first RM4 million expenditure incurred* within 8 years of assessment from 2015 to 2023.

CATEGORY 2 – Other industries

Automation Capital Allowance of 200% on the first RM2 million expenditure incurred* within 8 years of assessment from 2015 to 2023.

Automation Capital Allowance has been expanded to Services Sectors as announced by the Government in National Budget 2020 on 11 October 2019

Eligibility Criteria

Manufacturing companies incorporated under the Companies Act, 1965/2016 and resident in Malaysia.

Possess a valid Business License from Local Authority and Manufacturing License from MITI or a Confirmation Letter for Exempted from Manufacturing License from MIDA (whichever is applicable).

Companies have been in operation for at least 36 months.
Criteria of automation machine/equipment

Automation machine/equipment is used directly in the manufacturing activity.

Automation machine/equipment should enhance the productivity such as reducing man hours, reducing workers and increasing volume of output and to be verified by SIRIM.

Automation machine/equipment adopts technology that is more advanced than the technology currently used by the company and to be verified by SIRIM.

Machine should be used at least one (1) month after installation/commissioning.

For new products, the machine should be in operation for at least three (3) months after the production of the first batch of that new product.

Criteria of incentives

Companies currently claiming Reinvestment Allowance (RA) can opt to claim the Automation CA provided that only one of these two incentives is claimed in the same year of assessment. The period of RA will continue even though the company has opted for this incentive. However, the company must utilize the full amount of RM4 million (Category 1) or RM2 million (Category 2) before it continues to claim RA.

If a company decides to claim the Automation CA first before claiming RA, the incentive period for both Category 1 and Category 2 (YA 2015 – 2023) will form part of the 15-year period of RA.

This incentive is mutually exclusive to other incentives i.e. companies can only enjoy either one of the incentives that include Automation Capital Allowance (Automation CA), Reinvestment Allowance (RA), Pioneer Status (PS), Investment Tax Allowance (ITA) or Allowance for Increased Exports (AIE).
Documents needed to apply Industry 4WRD Intervention Fund

- Three (3) sets of Application Form (*ML-Automation CA Form*)
- A copy of Business License (*mandatory requirement*)
- A copy of Manufacturing License or a copy of Confirmation Letter for Exempted from Manufacturing License (*whichever is applicable*)
- A copy of tax incentive approval letter(s) (*if applicable*)
- List of purchased and installed machines/equipment
- Invoices/Purchased Orders and Delivery Orders for the machines/equipment
- Proof of documents to indicate that the entire cost of the machine/equipment has been paid

Unlock the Power of Industrial Automation

Let Fusionex unlock your machine potential to optimize and speed up repetitive and discrete processes through the power of AI-augmented automation. This transformational approach empowers your machines with data-driven production decisions, reducing waste and improving production processes. At the end of the day, your business will benefit from higher success rates, greater cost-savings and more profitable outcomes.

About Us
As a global leader of the intelligent IoT systems and embedded platforms market, “Enabling an Intelligent Planet” is our corporate vision by Co-Creating the Future of Industrial IoT and Smart Cities through Ecosystem Partnership & Academia Collaboration.

Driven by the convergence of Information technology (IT) and operational technology (OT), the Industrial Internet of Things (IIoT) is a matrix of networks connecting equipment and devices, collecting data via sensor technology, computing and integrating data into platforms as services, and creating new business models and possibilities. In moving towards the next stage of IoT, Advantech has created a suite of innovative hardware and software integrated edge-to-cloud technologies. For customer convenience, we are offered as a complete one-stop shopping product line. Advantech keeps innovating IoT technologies and provides these bundled solutions to save valuable development time for our customers. Our goal is to support all our industrial IoT application needs.

The Customers Have Spoken

The 1st MES Project in 2006

“I would like to comment on the excellent MES you done for Vinda Malaysia Plant Operations. This brought forth our business objectives: To manage plant production, efficiency, quality and products. To provide other departments with reliable production information. These system was proven to be flexible and adjustable in scale, we successfully scale up across different sites and we have confidence it can continue growing in scale and features to accommodate our business growth.”

-Rodrigo Ruiz Pasquale, Associate Manufacturing Director

SCALABLE AI FOR MANUFACTURING OPERATIONS

20+ YEARS OF MANUFACTURING EXPERIENCE

DRAG-N-DROP AI MODELING FOR FACTORY ENGINEERS

KNOWLEDGE MANAGEMENT
Share AI models within the organization to increase data literacy.

PRODUCTION EFFICIENCY
Do-it-yourself AI models to increase production efficiency, on-time delivery and reduce energy consumption.

PRODUCT QUALITY IMPROVEMENT
Build drag-n-drop prediction models to discover optimal raw materials mix, improve product design and optimize manufacturing process operations.

ASSET MANAGEMENT
Explore new ways to increase asset availability, reduce parts inventory and perform predictive maintenance.

With a powerful All-In-One business solution, business digitalisation is now effortless!

Exabytes, Malaysia’s established one-stop digital transformation solution provider, is a pioneer in assisting companies in digital transformation. Our core products and technology – online business setup, digital marketing, website creation and entrepreneurial solutions – inspire and assist customers to expand and grow their business online.

- Assist your company in digital transformation and establishing your own brand
- Provide your company with a professional business email address and service
- Assist you to create and attract more business opportunities
- Assist you to reach more potential customers easily

FMM INDUSTRY 4.0 Solution Providers

No-touch Switch, Your best partner under COVID-19

No-touch Infrared Sensor Switch
- Induction distance: 1~15cm
- Action delay time: 0.5~20 sec
- Sensing / Standby, Lock, Toggle Mode
- With Relay (N.C. and N.O. output)

ACS-20B-MRTU
- Lock function (Specific time period)
- Support RS-485 / Modbus RTU
- Record induction times: 1,000 records
- Offer black and white exterior

Projector control
Air conditioner control
Monitor (TV) control

Universal IR Learning Module
Infrared Device integrated helper
- Ethernet interface, 2x IR outputs, 224x IR cmds
- Modbus TCP/UDP protocol to emit IR cmds
- 6 learning IR carrier frequencies: 33, 36, 37, 38, 40 and 56 kHz

ICP DAS CO., LTD. Industrial Computer Products and Data Acquisition Systems
+886-3-5973366 info@icpdas.com / sales@icpdas.com www.icpdas.com
ifm solutions for your industrial revolution 4.0

Industry 4.0, the bridge to predictive maintenance
- Control systems to maximise process reliability
- Real-time monitoring for healthy machinery
- Reduce downtime and unscheduled stoppages
- Detect machine damage at an early stage
- Increase the life span of machinery and productivity
- Provide reliability and increase efficiency

Consequential information from smart sensors and communication technology allows for easy integration into existing and new plant. This allows all responsible personnel easy access to modern information that interacts with all platforms of information sharing, PCs, tablets, smartphones with intuitive messaging and alerts that make production processes transparent. Up time is increased, with early detection of potential faults.

PAVING THE WAY TO THE HEART OF INDUSTRY 4.0 WITH OUR CUSTOMERS

ATNESIS

“Our workers are happy because they are given clear instructions and sufficient training.”

“Monitor ERP is one of the pioneers in Europe to set up SMART Factories which aligns with our direction.”

Aemulus

“It took a while, but was worth every single cent.”

“MONITOR ERP is designed with a solid understanding of the importance of efficient operational management.”

SKY RESOURCES

“We are using the Sales Forecast function to simulate the quantity and cost required in the next one or two months. This gives us foresight in our cash flow management. It also allows us to bargain for volume discount for the most consumed materials.”

“With a fully integrated MONITOR ERP System, it promotes clarity of statuses across multiple departments, with information readily available at our fingertips.”

KOOKA

Working hand in hand with over 100 customers in Southeast Asia.

Cost Analytics Made Simple

We help organizations improve bottom line by understanding and assigning cost effectively to the manufacturing process.

Manage cost by understanding cost drivers
Increase profit by effective cost management
Gain insights of manufacturing activities

Key Features of Numa Activity Based Costing solution:
1. Flexible Cost Modelling
2. Robust Multi-Level Cost Allocation
3. Targeted Pricing Modelling
4. Multi-Dimensional Analysis By Segments
5. Integration with your current system
6. What-If scenarios enable the analysis of multiple outcomes
7. Resource Planning
8. Self-service Reporting

One Connection

Seamless machine control and factory automation

One machine control through one connection and one software is how we define the Sysmac automation platform. The Machine Automation Controller integrates logic, motion, safety, robotics, vision, information, visualization and networking under one software: Sysmac Studio. This one software provides a true Integrated Development Environment (IDE) that also includes a custom 3D motion simulation tool. The machine controller comes standard with built-in EtherCAT and EtherNet/IP. The two networks with one connection purpose is the perfect match between fast real time machine control and data plant management.
Since the 1980s till today, companies have been implementing process improvements techniques such as Six Sigma, Lean, Just-in-Time, etc. However, in today’s more globalized and competitive environment, companies are looking beyond these techniques for new levels of productivity.

In this era of Industry 4.0, new computing capabilities such as edge computing, Internet of Things (IoT), Big Data, Artificial Intelligence (AI), and other emerging technologies enable companies to harness intellect effectively to drive new levels of efficiencies and performance.

Phitomas is one such solution provider that offers digital transformation and technology solutions. Partnering with some of the world’s leading technology providers, Phitomas is at the forefront of innovation to address the entire breadth of clients’ needs in transforming towards an Intelligent Enterprise.

Reach out to us today and bring your business to the next level of productivity.

Phitomas.com
The Malaysian Smart Factory (MSF) 4.0 program @ SHRDC offers smart factory competency training through hands-on and online/remote learning approaches, ideal for relevant skillset and talent development towards an Industry 4.0 ready workforce in Malaysia.

Smart Factory takes current manufacturing processes to Industry 4.0 standards; highly agile, efficient and automated production lines capable of data generation and collation. Combined with analytics and machine learning, the factory of the future will have predictive and prescriptive capabilities, contributing to higher productivity & boundless innovation.

### PROGRAMS OFFERED:

- **Smart Factory Technical Overview:** Enabling Technology for Industry
- **PLC Essentials**
- **Data Generation**
- **Machine Data Logging & Visualization for Smart Factory**
- **Overall Equipment Efficiency**
- **Data Analytics**
- **Professional Drone Operator**

The Representative of Taiwan ICT Industry

Taipei Computer Association (TCA) was established on Nov. 5, 1974. The corporate members of this non-government and non-profit organization have grown from 15 to more than 4000. The current Chairman is Mr. Paul SL Peng, the Chairman of AUO. TCA has branch offices across all areas in Taiwan, and overseas representatives in Tokyo (Japan), Suzhou and Beijing (China) to provide more efficient services to our international customers. The organization is a well-recognized representative of Taiwan ICT industry, as 90% of Taiwan ICT industry’s total production value came from its members. TCA strives to become the driving force of Taiwan ICT industry as well as a world-class business organization.

The Smart Manufacturing Special Interest Groups

The Industrial Development Bureau (IDB), the Ministry of Economic Affairs (MOEA), Taiwan has supported that TCA has invited its members to build 4 Special Interest Groups (SIGs) for Smart Manufacturing in 4 industry, including Textile, Machinery, Metal-Processing and Food. The SIGs has successfully assisted lots of stakeholders to achieve the digital transformation.

Digitizing Lean Management for Performance Gains

Digital Lean management needs just one power tool: your people

What is digital Lean management?

- It’s a focus on empowering people with access to information anywhere, anytime
- It’s about decision-making support with visibility that drives operational performance vs. plan
- It’s data analytics used to systematically reduce waste and losses

It’s accelerating Lean management transformation

Improve your discrete manufacturing productivity. Enjoy a FREE 90-day trial of Discrete Lean Management today!
