

SUPPLY CHAIN MANAGEMENT (ONLINE)

24-25 MAY 2021

9:00 A.M. - 5:00 P.M.

via

Course Introduction and Objectives

As the terminology change from Materials Management to the total Supply Chain Management, are you following the current of change or being left behind? It is always never too late to examine and enhance the new management philosophy, to pick up more strategies and approaches in this era. The change of concept provides a broader view. It also prepares us in facing the global competition. Thus, exploring various dimensions of the Supply Chain Management strategies and benchmarking best practices are essential. To succeed as a member of a supply chain, and make the supply chain work as whole, firms today must develop strategic partnerships, sharing information, working together to reduce costs and to cut down lead-times, and building total quality into all stages of the supply chain.

At the end of the program, participants would be able to:

- Provide participants with a comprehensive understanding of Supply Chain Management concepts and strategies
- Appreciate the importance and existence of various functions in an organization, as an integration part in the supply chain management
- Examine the impact of corporate strategies on the financial health of an organization
- Add value at every step of the chain and promote cooperation

** Download and install ZOOM app on your laptop/desktop before the training.*

** Registration Link and Password will be provided upon confirmation of the training.*

Speaker's Profile

Ms. Cheryl Neoh has been working in Purchasing and Materials Management for more than 12 years with 6 years exposure in semiconductors industry at Multi-National Company and 6 years solid hands-on experience in setting up the whole Materials Department in SMT (PCBA / OEM) industry. She then ventured into managing a business unit by setting up a northern branch for a leading computer distributor where she acquired a great deal of experience in sales and marketing. Over the years, she had developed solid experience in the total Supply Chain Management. She had trained and developed many practitioners who are involved in Supply Chain Management in the

manufacturing industries.
