ZERO-RISK EECA COMPLIANCE + REAL COST SAVINGS: IOTWATT 4.0 AI/ML DIGITAL ENERGY AUDIT (ZERO CAPEX)

IoT Watt 4.0 Digital Energy Audit uses AI/ML analytics to continuously identify energy waste, improve equipment utilisation, and convert insights into accountable actions—so facilities can **reduce energy costs**, improve productivity, and stay EECA-compliant. Best of all, it is delivered under a **ZERO CAPEX**, outcome-first model, enabling organisations to start with no upfront investment and minimal risk.

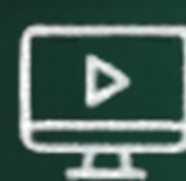

IoT Watt 4.0 also supports compliance execution by generating both the **Annual EECA Report** and the required **Periodic Energy Audit Reports**, helping organisations strengthen readiness, governance, and audit support.

TUESDAY
APRIL 14, 2026

10:00AM – 12:00PM
