WEDNESDAY, JUNE 24, 2026 | 10.00 A.M.-11.00 A.M | ZOOM

How the CRESS Helps the Industries to Offset Scope 2 Emissions and Overcome Carbon Price

This webinar will provide practical insights on how the Corporate Renewable Energy Supply Scheme (CRESS) can help industrial businesses offset Scope 2 emissions, manage carbon-related costs, and optimise electricity expenses amid growing pressures from Malaysia's carbon tax and the EU's CBAM.

Register now for insights on:

- What CBAM and carbon tax mean for Malaysian manufacturers and exporters
- How carbon emissions impact manufacturing costs and export competitiveness
- Electricity as a key driver of Scope 2 emissions
- Introduction to CRESS and how it supports Scope 2 emission offsetting
- Potential operational and cost-saving opportunities

WHAT YOU WILL GAIN

- Better understanding of CBAM, carbon tax, and global carbon regulations
- Awareness of how carbon emissions affect operational cost and export competitiveness
- Practical strategies to offset Scope 2 emissions through renewable energy procurement
- Understanding of how CRESS can support CO₂ offsetting and electricity cost optimisation
- Exposure to real implementation approaches and potential business benefits

WHO SHOULD ATTEND

- **High-voltage (HV) consumers** with significant electricity demand looking to offset Scope 2 emissions
- **Manufacturers and exporters** exposed to CBAM compliance costs or customer ESG requirements
- **Facility and sustainability teams** seeking practical, certified renewable energy solutions
- **Business owners and decision-makers** preparing for Malaysia's carbon pricing landscape
