

RESIN FLOORING SOLUTIONS FOR THE FOOD INDUSTRY

MEETING HACCP STANDARDS

Behind every type of food and beverage we consume daily lies a complex chain of processes that includes production, storage, distribution, and preparation. Each of these stages takes place in environments with specific technical and hygiene requirements.

This seminar highlights the essential features of flooring systems used in the food industry and the key requirements imposed by the HACCP management system, focusing on hygiene, cleanliness, and food safety.

The speakers will also present case studies illustrating common flooring issues, their root causes, and preventive solutions to help facility owners achieve not only regulatory compliance but also durable, fit-for-purpose floors with long service lives.

 **JANUARY 29, 2026 (THURSDAY)**
 **DEWAN FMM, WISMA FMM**
