

Go live on SAP Cloud ERP in weeks | built for an AI-powered Malaysia.

A pre-scoped, fixed-price path to SAP Cloud ERP for Malaysian mid-sized enterprises, engineered for predictable timelines, e-Invoicing readiness, and the national push toward MD2030. Purpose-built to redefine manufacturing processes — from shop floor to supply chain — with embedded Business AI.

ALIGNED WITH MALAYSIA DIGITAL 2030

Engineered for Malaysia's Manufacturers — Fixed Scope, Fixed Price, Fast Go-Live.

MD2030 TARGET
30% of GDP from the digital economy

NATIONAL PUSH
500,000 high-value tech jobs

YASH RESPONSE
ERP + Business AI, live in weeks

WHY THIS MATTERS NOW

In June 2026, Prime Minister Anwar Ibrahim launched **Malaysia Digital 2030 (MD2030)**, the national action plan for 2026–2030 that repositions Malaysia from a technology consumer to a producer of home-grown innovation, on the path to becoming an **AI-powered nation**. For mid-sized enterprises, that shift starts on the ground: modern, connected, AI-ready ERP. The YASH F1 Package for SAP GROW Fast gives Malaysian businesses a structured, low-risk way to get there, without a multi-year transformation cycle.

For manufacturers specifically, MD2030's push toward high-value tech jobs and digital GDP starts with digitizing core plant and supply chain processes — production planning, shop-floor execution, quality, and compliance, not just back-office finance. The YASH F1 Package brings that transformation to the factory floor.

YASH F1 PACKAGE OVERVIEW

ERP transformation often feels daunting for Malaysian mid-sized enterprises, with long timelines, unclear scope & escalating costs. The YASH F1 Package changes that narrative.

SAP is not just for large enterprises. The YASH F1 Package is purpose-built for Malaysian mid-sized manufacturers, with fixed scope, fixed price & fixed duration, removing the cost and complexity barriers that once kept SAP out of reach.

- Automate finance, procurement & supply chain processes in weeks.
- Embedded SAP Business AI and Joule Agents deliver real-time insight across forecasting, compliance & operations, including predictive maintenance alerts, production planning recommendations automated compliance checks on the shop floor.
- Unified dashboards give finance and operations leaders one source of truth.
- Start lean with core ERP, expand seamlessly as the business grows.
- Redefine manufacturing workflows - production scheduling, shop-floor execution, inventory and supply chain visibility - on one connected cloud ERP platform.

Business AI in Manufacturing — Practical Examples

- Predictive Maintenance:** Joule Agents flag equipment health issues before breakdowns, reducing unplanned downtime.
- Production Planning:** Business AI recommends optimized production schedules based on demand, capacity, and material availability.
- Compliance Automation:** Automated checks against regulatory and quality standards across manufacturing and supply chain processes.

KEY ADVANTAGES

8-10 wks Go-live with a pre-scoped implementation model

Fixed Scope, price & duration reduce delivery uncertainty

50% Lower implementation cost through streamlined delivery

MVS Minimum Viable Scope avoids unnecessary complexity

"Built for Mid-Sized Manufacturers" — fixed scope, price & duration designed specifically for Malaysian mid-sized manufacturing enterprises, not just large enterprise SAP deployments.

PACKAGE OPTIONS

OPTION	SCOPE	DURATION
